SUMMARY

Senior Frontend Developer with 4+ years of experience building FinTech, insurance, and consumer-facing web applications using React, Next.js, and TypeScript. Built a white-label FinTech PWA from scratch for multiple organizations and led frontend development of a multi-domain insurance platform, coordinating integrations with four backend teams. Focused on frontend architecture, performance, code quality, and developer tooling.

SKILLS

Frontend Engineering

TypeScript · JavaScript · React.js · Next.js · TanStack Query · Zustand

Web Platform & UI

Progressive Web Apps (PWA) · Legacy Browser Compatibility · Internationalization · Tailwind CSS · styled-components

Tooling & Quality

Vite · PostCSS · ESLint · Git Hooks

WORK EXPERIENCE

Senior Frontend Developer at HeseTazegi

Nov 2025 - Current

Hybrid

- Developed the first iteration of a React and TypeScript TV web app under a tight deadline, implementing browsing and remote-control navigation for an Android 6-based environment.
- Built 3 custom Tailwind CSS/PostCSS plugins to replace unsupported CSS features, supported by Vite, polyfills, and ESLint/Stylelint checks for legacy-browser compatibility.
- Built a Docusaurus/MDX engineering documentation portal in the existing pnpm workspace, automating synchronization of 9 Markdown documents for architecture and onboarding.

Frontend Team Lead at Hama Insurance (Golrang Industrial Group)

Sept 2024 - Nov 2025

Tehran, Iran

- Built a React and TypeScript insurance administration frontend from scratch, using feature-based architecture and TanStack Query caching for complex insurance workflows.
- Led frontend development with 4 backend teams, coordinating API integrations and feature delivery across insurance domains.
- Designed a 26-column form-validation template covering data types, field constraints, and conditional rules; Product adopted it as a shared requirements reference.
- Worked with backend leads to standardize API error responses and implemented centralized frontend error handling across services.
- Enforced feature boundaries with custom ESLint rules and automated Git/CI checks; integrated Sentry tracing and Session Replay for error investigation.

Frontend Developer at Asoo Pardaz Ulfat (Ultra Wallet)

Feb 2023 - Jul 2024

Tehran, Iran

- Built a React and TypeScript PWA from scratch for an employee wallet and BNPL platform, enabling Mihan and Mammut employees to spend credit, wallet balances, and cashback at partner merchants.

- Adapted the shared Ultra Wallet codebase into white-label versions, including Farda Plus, using brand-specific branches, themes, assets, and localization.
- Developed QR merchant payments and wallet top-ups using TanStack Query and Axios, handling merchant identification, account selection, gateway redirects, and transaction states.

Frontend Developer at Hamsaa (UBank — Saman Bank VIP)

Aug 2022 - Feb 2023

Tehran, Iran

- Proposed and helped implement virtualized chat rendering with message-specific layouts to reduce lag when scrolling through long conversations.
- Migrated API data handling from Redux-Saga to TanStack Query across existing modules, simplifying caching and loading/error states while retaining Redux for other application state.

PROJECTS

Turborepo Template — Frontend Monorepo & UI Library

Skills: TypeScript · React · Next.js · Turborepo · pnpm · Storybook · GitHub Actions

https://github.com/saeedkefayati/turborepo-template

Extended a Turborepo starter into a reusable TypeScript monorepo with shared React UI components, configurations, and engineering documentation.

- Built design tokens and reusable UI components with Storybook and component tests; added Git quality gates and CI workflows.

Venus Pajohan — Interactive Corporate Website

Skills: Next.js · React · JavaScript · styled-components · GSAP · ScrollMagic · Responsive Design

https://venus-pajohan.vercel.app

Independently developed a responsive corporate website frontend from provided designs using Next.js, GSAP, and scroll-driven animations across desktop and mobile layouts.

Immigration Information Platform

Skills: Next.js · React · JavaScript · Sanity CMS · GROQ · Mapbox

https://immigration.vercel.app

Built an immigration website prototype from scratch using Next.js and Sanity CMS, with structured content models and dynamic pages for countries and immigration pathways.
